

WHY IS IT?

(Continued from last week's advertisement.)

We contend that most people make their own hard times by spending their money without thought, without knowing the value of the articles bought, and the prices they can be bought for at cash. They think all stores are alike in one respect, that is they charge all they can get, and the poor or those who have little money have to pay the highest prices. This is true when these people get a little money ahead and step into the first store and buy without being posted on prices, or take a book and have the goods charged, at any price. We will quote some prices on goods we sell and give the regular prices which the same goods sell at elsewhere:
